DETAILED ACTION

This is a response to the Applicant's amendment submitted on April 30th, 2004. In virtue of this amendment, claims 5-11 are cancelled; claims 12-15 are newly added; and thus, claims 1-4 and 12-15 are now presented in the instant application.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This Examiner's amendment is purposefully made to correct some existing typographical errors in the claims, to rectify the claimed terminology for consistency, and to improve antecedent basis, and thus to provide a proper characterization of the claimed invention.

The Examiner believes that this amendment does not affect any scope of any claim as originally filed.

The Applicant is noted that a telephone call was made to Mr. James W. Badie on May 31st, 2004 to expect a discussion in regard to this amendment. However, no response was made afterwards.

Line 5, insert --an output for-- between "and" and "providing";

Line 11, insert --an-- between "supplying" and "oscillating";

Allowable Subject Matter

2. Claims 1-4 and 12-15 are allowed.

Reasons for Allowance

3. The following is an examiner’s statement of reasons for allowance:

Prior art fails to disclose or fairly suggest:

- An electronic ballast system comprising an emergency inverter ballast circuit for supplying power to the first fluorescent lamp when the first inverter ballast circuit is disabled, without preheating the first fluorescent lamp, in combination with the remaining claimed limitations as called for in independent claim 1 (claims 2-4 are allowed since they are dependent on claim 1); and
- An electronic ballast system for operating four fluorescent lamps including a first fluorescent lamp, a second fluorescent lamp, a third fluorescent lamp, and a fourth fluorescent lamp comprising an emergency inverter ballast circuit for supplying power to one of said fluorescent lamps when said other fluorescent lamps are disabled without preheating said fluorescent lamp, in combination with the remaining claimed limitations as called for in independent claim 12 (claims 13-15 are allowed since they are dependent on claim 12).
